

## Top links

### [New Packet Radio](#)

IP over 430MHz Ham Radio, 50 to 500kbps, 20W RF. Extension for HSMM-Hamnet-AREDN.

[New Packet Radio](#)

### [Solar cycle 25s maximum might arrive earlier and hit harder](#)

The current solar cycle has a forecasted peak sometime in 2025.

[ZeroHedge](#)

### [Field Day with 4 AA batteries](#)

I used a tiny rig that fits in a 3 X 5 inch box and runs on 4 AA batteries.

[W1PID](#)

### [Hamsat: Working the birds? Let the world know](#)

Post an activation alert when you plan to be on a satellite.

[WW1X](#)

### [It is possible to have an RF-quiet home PV \(solar\) electric system](#)

For the past several years an incremental nemesis of Amateur Radio operation on the HF bands is solar power.

[KA7OEI](#)

### [Roll your own tube tester](#)

Not comprehensive, but good enough most of the time.

[Hackaday](#)

### [Hystérésia](#)

Art installation listens to zombie satellites.

[Hystérésia](#)

### [Receiving unintentional voice transmissions from GPS satellites](#)

Malicious pirates may be actively using these SAR repeaters for their own communications.
